#### WHAT IS SHOPWATCH?

Nearly every town and city in The UK has a shop watch system. This comprises of a set of hand held radios that connect shops, businesses, pubs and even traffic wardens and road sweepers to the Police and each other. Suspects are spotted and then their details are passed on the radio as a warning to other users. You'll hear all kinds of things from shops calling for the police to assist with shoplifters to pubs having trouble with drunks at night.

You will find many towns schemes use the same frequencies for Shop Watch in the day as they do for Pub Watch at night though some areas do have separate frequencies for this. We are painstakingly keeping this list up to date on a regular basis so please let us know if you have any updates or comments.
